PROFILE

I am a 23-year-old Frontend Developer with one year of professional experience, currently completing an integrated Master's in Informatics and Computer Engineering at the University of West Attica. My work focuses on building responsive, accessible, and well-structured web interfaces that prioritize user experience. What began as curiosity soon quickly turned into a passion — the blend of creativity, structure, and problem-solving of frontend development felt like the perfect fit. Since then, I've been fully immersed in learning and building, always aiming to write clean, maintainable code and craft user-friendly experiences. I see each project as a chance to improve, create with purpose, and grow as a developer.

EDUCATION

UNIVERSITY OF WEST ATTICA
Integrated Master's Degree in Informatics & Computer Engineering
Oct 2020 - Expected 2025 | Athens,Greece
Network Programming || Algorithm Design and Dynamic Programming || Object Oriented Programming || Artificial Intelligence || MySQL

HIGH SCHOOL
Graduated in June 2020 | Aliveri, Greece

ENGLISH SCHOOL
Graduated in December 2017 | Aliveri, Greece

MILITARY SERVICE

Completed mandatory service in the Hellenic Army (Nov 2024 – Aug 2025)

RESEARCH GROUPS

• TALOS U.V.S - University Of West Attica

SOFT SKILLS

• Adaptable and able to thrive in fast-paced environments
• Strong attention to detail and commitment to accuracy
• Strong organizational and time management skills
•Creative thinker with a focus on practical, innovative solutions
• Flexibility and willingness to learn and adapt to new technologies or methods
• Proficient in efficient communication, with the ability to effectively convey ideas and information to others.

CERTIFICATIONS

• AZ-900: Microsoft Azure Fundamentals

TECHNICAL SKILLS

•Javascript(ES6+) •NextJS • React •Typescript •Tailwind •ASP.NET •NodeJS •ReactNative •REST APIs •HTML •SaSS •MySQL •Git

EXPERIENCE

PRIME EDUCATIONAL SOFTWARE APPLICATIONS - FRONTEND DEVELOPER
Nov 2023 - Nov 2024 | Alimos, Athens
•Developed and maintained dynamic web interfaces for educational platforms using JavaScript, Razor, Bootstrap, SASS and .NET technologies
•Collaborated closely with backend developers and QA teams to deliver robust and scalable features in C# ASP.NET MVC
•Built reusable UI components while ensuring cross-browser compatibility and responsive design across platforms
•Integrated frontend with RESTful APIs and improved data handling workflows using AJAX and jQuery
•Contributed to updates, fixes, and improvements in production-ready .NET web applications
•Worked with SQL Server for data integration and form-driven application interfaces
•Contributed to UI/UX enhancements to increase clarity and accessibility for educational users

HELLENIC STATISTICAL AUTHORITY.
October 2021 - December 2021 | Athens,Greece
• Demonstrated the ability to communicate clearly and persuasively with individuals from diverse backgrounds.
• Maintained a high level of accuracy while counting and recording data to ensure data integrity.
• Successfully adjusted to various environments and handled unexpected situations with professionalism and flexibility.
• Displayed empathy and respect towards residents while working with them, ensuring a positive experience.

PROJECTS

PROJECT "UNIFLOW"
UniFlow Manager, my most ambitious project yet — a full-stack project management tool built with React to help students stay organized and manage academic work more efficiently. It integrates directly with university accounts, automatically pulling course data via web scraping to create task boards tailored to each student's classes. Key features include collaboration with role-based permissions, in-app chat for each task, a drag-and-drop UI for managing assignments, and secure authentication powered by Clerk. Currently in beta and supporting the University of West Attica.
Live Demo: **UniFlow**
